

I pay for Satellite Radio to provide me local traffic and weather. Broadcast radio derives its income from advertising. Some people prefer "free" radio with ads, but I don't. Do not allow the NAB to prohibit satellite radio from providing services for which I have paid. Do not restrict our choices. I suspect that the overwhelming majority of people prefer "free" radio with ads. Allow the few of us who choose a different alternative to have the best service possible.

Thank you for your consideration.
